

## Feature: Login

As a MapFre User, I want to be able to access my MAPFRE account, using valid credentials.

Scenario: User enters a correct email and password

Given: a user navigates to the login page in any supported browser (Chrome, Firefox, IE11, Safari 11)

When: a user enters a correct email and password combination

And: the submit button activates

And: the user clicks on the submit button

Then: the user is redirected to the dashboard

Scenario: User enters an incorrect email or password

Given: a user navigates to the login page in any supported browser (Chrome, Firefox, IE11, Safari 11)

When: a user enters an incorrect combination of email or password

And: the submit button activates

And: the user clicks on the submit button

Then: a login failure message is presented to the user

And: data user entered remains populated

And: the submit button is deactivated until user modifies one of the 2 fields

Scenario: User enters an incorrect email format

Given: a user navigates to the login page in any supported browser (Chrome, Firefox, IE11, Safari 11)

When: a user enters an incorrect email format

And: leaves the email input field (lost focus)

Then: an inline error with "incorrect email format" is displayed under the input.

Scenario: User clicks create an account

Given: a user navigates to the login page in any supported browser (Chrome, Firefox, IE11, Safari 11)

When: a user Clicks on "create account"

Then: the user is redirected to create account screen

Scenario: User clicks forgot password

Given: a user navigates to the login page in any supported browser (Chrome, Firefox, IE11, Safari 11)

When: a user Clicks on "forgot your password"

Then: the user is redirected to forgot password screen
